

# FAHS MFP DOCTORAL PROGRAM FELLOWS

MFP Fellows are provided mental health and substance abuse training, direct, research mentor, career and financial support to guide them to graduation and practice as an MFT through completion of LMFT license.

Doctoral Fellows remain committed to increasing the number of mental health and substance abuse services to racial and ethnic minority populations and underserved populations

"What will you be doing after the Fellowship year has completed?"

- Entering the Workforce

"I am very prepared to enter the MFT workforce."

- MFP Fellow

385 Doctoral Alumni

Since 2007

### INCREASE IN RESEARCH PUBLICATIONS

Development of scholarly publications, increase in level of quantifiable research and analytical skills, and in underserved populations

### RELVANCY TO DEGREE IN MFT

Program Training, Substance Abuse Training, Inclusion Workshops, Professional Development, Certifications

### INCREASED DESIRE TO SERVE/PRACTICE AS MFT

Improving mental health and substance abuse services to racial ethnic minority populations and underserved populations

#### MFP Fellow Testimonials

"The MFP has increased my desire to improve mental health and substance abuse services to underrepresented racial and ethnic minority populations in the following areas:

Changing Policy, Serving on Governance/Leadership Boards, Advocacy, Direct Service, Research."

Prior to this year, when I thought of diversity, I mostly thought of race. Being exposed to the workshops and hearing other Fellows' research projects, I've come to be passionate about many more intersections of marginalized identities. The MFP helped me to feel empowered to work with individuals, families, and systems.
